

# NCFE Revision Guide – Written Exam Paper

1a. Two ways a <b>MIDI keyboard</b> can <b>input information</b> into a DAW	<p>1. <b>Notes played</b> from keyboard to input <b>pitch</b> and <b>length of note</b></p> <p>2. Using <b>fader</b> to <b>control mixing</b></p>	 <p style="text-align: center;">MIDI keyboard</p>
1b. Other types of <b>MIDI controller</b>	<p><b>MIDI drums</b></p> <p>MIDI guitar</p>	

2a. How is <b>sound created</b> ?	<p><b>Audio</b> – by <b>playing</b> an instrument/singing</p> <p><b>Software instrument track</b> – by <b>MIDI information triggering sounds</b> from a synth</p>	<p style="text-align: center;">Audio      Software instrument</p> 
2b. How can the <b>sound be changed</b> in a DAW (Logic Pro X)	<p><b>Audio</b> – <b>Audio editing tools</b> and <b>EQ</b></p> <p><b>Software instrument track</b> – <b>MIDI editing tools</b> e.g. quantize, lengthening, copy</p>	<p style="text-align: center;">Audio editing      MIDI editing</p> 

3a. What is <b>reverb</b> ?	<b>Plug in</b> used to make a <b>voice</b> sound like it was <b>recorded in a large hall</b>	<p style="text-align: center;">Reverb plug in</p> 
3b. What is a <b>noise gate</b> ?	<b>Plug in</b> used to <b>minimise unwanted background sounds</b>	<p style="text-align: center;">Noise gate plug in</p> 

4. A <b>microphone</b> is plugged in but <b>no sound</b> is coming out	<p><b>Problem</b> – DAW track not in <b>monitor mode</b></p> <p><b>Solution</b> – Turn on <b>monitor mode</b> on track</p>	 <p style="text-align: center;">Monitor mode in Logic</p>
--	--	---

5. What is <b>MIDI quantise</b>	Putting notes that are played in <b>into time</b>	 <p style="text-align: center;">MIDI quantise in Logic</p>
---------------------------------	---	--

6a. Two types of <b>audio files</b>	1. WAV 2. Mp3	WAV used for CDs	mp3's are not great quality
6b. Best type of audio file for a <b>CD</b>	WAV  Why – It has the highest quality audio for CD		

7a. What instruments: <b>Dance music</b>	Vocals, Laptop, Sampler, Keyboard, Drum machine	Dance music e.g. Avicii	Rock e.g. Green Day
7b. What instruments: <b>Rock music</b>	Vocals, Guitar, Bass guitar, Keyboard, Drums		
7c. What instruments: <b>Jazz music</b>	Saxophone, Trumpet, Upright bass, Piano, Drums		

8. What does <b>C7</b> mean?	1. The <b>root note</b> is C 2. The chord is <b>extended</b> by adding a <b>7<sup>th</sup> note</b>		C7 played on the piano
------------------------------	--	---	------------------------

9a. Features: <b>80s Electronic music</b>	<b>Synthesizers</b> used for majority of sounds e.g. Depeche Mode	Depeche Mode live	Grandmaster Flash live
9b. Features: <b>Rock music</b>	<b>Electric guitars</b> used extensively often with <b>distortion</b> effects e.g. Iron Maiden		
9c. Features: <b>Hip hop music</b>	<b>DJ decks</b> used for <b>effects</b> and <b>scratching</b> e.g. Grandmaster Flash		

10a. Other than studio monitors, how else can you <b>listen to music</b> ?	Headphones	Headphones	Studio monitors
			

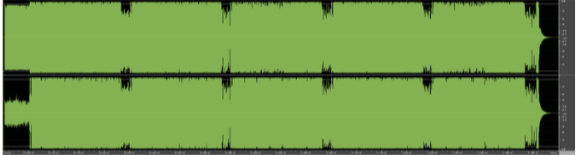

<p>11. Before <b>1970s</b> most studios used <b>4 track tape</b>. Now modern DAWs have virtually <b>unlimited tracks</b>.</p>	<p>Explain <b>two advantages</b> of having more tracks:</p> <ol style="list-style-type: none"> <li>1. Allows you to <b>try out more ideas</b> as more tracks are available</li> <li>2. Allows you to <b>layer instruments</b> to make <b>more complex</b> recordings</li> </ol>	<p>4 track tape</p> 	<p>Logic with many tracks</p> 
---	---	--	---

<p>12a. Where would you place <b>3 microphones</b> on the <b>drum kit</b>?</p>	 <p>1) Kick drum; 2) Snare; 3) Overhead</p>	<p>Drum mic placements</p> 	<p>Condensor microphone</p> 
<p>12b. What type of <b>microphone</b> would you use and why?</p>	<p><b>Type: condenser mic</b></p> <p><b>Why:</b> Used as <b>overhead mic</b> to get <b>high frequency detail</b> from drum kit</p>		

<p>13. Describe 2 <b>health and safety issues</b> in this picture of a small studio workstation</p>	<ol style="list-style-type: none"> <li>1. <b>Cup of tea</b> – liquid could fall onto equipment and cause electrocution.</li> <li>2. <b>Loose wires</b> – someone could trip over</li> </ol>	 <p>Example of health and safety issues</p>
---	---	---

<p>14. Explain what the term '<b>Foley</b>' means</p>	<p>Sound recorded using <b>props</b> to <b>mirror sounds</b> on screen</p>	 <p>Foley being recorded</p>
---	--	--

15a. Identify the <b>problem</b> with this <b>audio file</b>	Sound is <b>distorted</b>	<p>Figure 2: Audio file</p>  <p>Distorted audio file</p>
15b. How could this have been <b>avoided</b> during recording?	Use the <b>gain control better</b> e.g. so the sound is recorded <b>without clipping</b>	 <p>Gain control dial on audio interface</p>

16a. What is a <b>sampler</b> ?	A device used to <b>play back</b> a recorded sound at a <b>variety of pitches (high or low)</b>	<p>Sampler</p> 	<p>Synthesizer</p> 
16b. What is a <b>synthesizer</b> ?	A device used to <b>create sounds</b> using <b>shaped waveforms</b>		

<p>17. You have been asked to <b>create</b> the sound of an <b>explosion</b> for use in a video.</p> <p>Evaluate <b>2 different methods</b> of sound creation to create this sound</p>	<p><b>Recording:</b></p> <ol style="list-style-type: none"> <li>1) Sounds more <b>realistic</b></li> <li>2) Could be <b>expensive</b> to record</li> <li>3) Might take a <b>long time</b> to record e.g. health and safety factors</li> </ol> <p><b>Synthesis:</b></p> <ol style="list-style-type: none"> <li>1) Sound <b>may not be as realistic</b> as a recording</li> <li>2) May be <b>much cheaper</b> to produce as no actual explosion is needed</li> <li>3) <b>Very quick</b> to produce using tech</li> </ol> <p><b>Conclusion:</b> Recording is better if <b>quality</b> is more important than <b>costs</b> and <b>time</b>, but Synthesis is better if the project is needed to be done <b>quickly</b> and at a <b>lower cost</b></p>	<p>Recording</p>  <p>Synthesis</p>
